Hi Marina,

ISA '04 does have a client but I didn't install it on any of the PCs. I did check that the proxy settings were as they should be after I uninstalled ISA and they are. Everything seems to be working correctly with the exception of the active/passive FTP issue. The only time I use FTP anymore is to put or get website files or I probably wouldn't have even noticed anything. Any other ideas?

Thanks again,  
Doug
