Hi Bill,

I have already tried the driver. It is the same on both MS and Sony site and its signed by MS, 8/31/2004 1.0.0.4. The same driver is used on 2K, 2K3 and SBS 2K3. Also I have used the Sony tape util, it functions fine and shows no errors. I have also tried the driver supplied by both Sony and MS too.

Thanks for sticking this out with me.

Dave
