Hi Godfrey,

Thank you for posting here!

For the SBS 4.5/2000, regarding the IIS lockdown tool, please refer to the KB article:

311862 How to Use The IIS Lockdown Tool with Small Business Server
<http://support.microsoft.com/?id=311862>

For the SBS 2K3, the IIS 6 has been totally redesigned and there is no need for a wizard based lockdown tool as the feature of "locked down" has been integrated in IIS6 and enabled by default.

If you need further assistance about IIS lockdown info for IIS 6.0, you can also post the question to IIS newsgroups.

I hope the above info helps and we look forward to working with you here again.

Have a nice day!
