I'm running SBS 2k3 Prem. Ed., I have setup a few .zap files to publish a few apps. at my users leisure. However, I have one app that does not install on a few machines. It will install on some and not on others. All other apps install w/o a hitch. I looked in the event log the one that doesn't install records a successful event. There is nothing significantly different about these machines except hardware. All software is the same and all are up to date.

I do get an error recorded in the Event Viewer as follows:

Event Type: Information

Event Source: Application Management

Event Category: None

Event ID: 307

Date: 2/23/2005

Time: 4:31:26 PM

User: SSA\bdr

Computer: BDR01

Description:

The launch of the setup command for application RAM Base Plate from policy RAM Software succeeded.

Event Type: Error

Event Source: Userenv

Event Category: None

Event ID: 1085

Date: 2/23/2005

Time: 4:07:13 PM

User: NT AUTHORITY\SYSTEM

Computer: BDR01

Description:

The Group Policy client-side extension Security failed to execute. Please look for any errors reported earlier by that extension.

Event Type: Warning

Event Source: SceCli

Event Category: None

Event ID: 1202

Date: 2/23/2005

Time: 4:07:13 PM

User: N/A

Computer: BDR01

Description:

Security policies were propagated with warning. 0x4b8 : An extended error has occurred.

Please review the detailed log security\logs\winlogon.log under Windows root to troubleshoot the application of security policy.

The clients security logs show this:

Wednesday, February 23, 2005 4:23:05 PM
