Hello Everyone,

My backups have been 100% perfect until today. I get a report of a skipped file which is "C:\documents and Settings\Network Service\Application Data\Microsoft\CLR Security Config\v1.1.4322\Security.config.cch.2920.147371343." Is this normal for this file to report being open and the backup job skips it? Thank you for any valuable input.

Joey
