Yes, I had created a DNS entry for the new sharepoint site, but I had just mapped it to the IP... the new sharepoint site can be accessed fine.. the business sites won't work anymore... (intranet.lloydresearch.com and www.lloydresearch.com) As you requested, here are the websites currently configured:

DESCRIPTION	HOST	HEADER	IP	ADDRESS
PORT	SSL	PORT		
Default Web Site			192.168.16.3	80 443
Lloydresearch Web	www.lloydresearch.com		192.168.16.3	9999
Microsoft Sharepoint Admin			192.168.16.3	9502
Sharepoint Central Admin			192.168.16.3	8081
companyweb	companyweb		192.168.16.3	80
Symantec Mail Security			192.168.16.3	8082
Test Project Site	projects		192.168.16.3	80
.
