Hello Andrew,

Thank you for your update.

To troubleshoot this issue, please refer to the below information:

1. The issue should be caused that the users are members of the 'Domain Power User' group, possibly that he has 'Power Users' template applied to the users. The 'Domain Power User' is a sub-group of 'SBS Remote Operators', and 'SBS Remote Operators' has the 'Deny Logon Locally' policy setting from 'Default Domain Controller' GPO. That will cause the ACL permission setting to be reverted.

I would suggest any of the following:

- 1) Apply the 'Users' template to the existing power users using the Change User Permissions Wizard.
- 2) Remove 'SBS Remote Operators' from the 'Deny Logon Locally policy' settings, re-apply the 'Power Users' templates to the user accounts.

2. This issue can occur if the problematic user a member of a Distribution group that is a member of any of the following groups:

- Enterprise Admins
- Schema Admins
- Domain Admins
- Administrators
- Domain Controllers
- Cert Publishers
- Backup Operators
- Replicator Server Operators
- Account Operators
- Print Operators

So you may record the Distribution groups that the problematic user account belongs to and then check if any of them are in one or more of the above

RE: Send As permissions getting overwritten

groups. If so you should alter the membership to avoid this issue.

Looking at Q319966 where depending on whether that group or the users are members of AdminSDHolder, those permissions can be reset every hour:

319966 "You do not have sufficient permissions in the Domain" error message
<http://support.microsoft.com/?id=319966>.

For more information, you can also take a look at the following KB articles:

817433 Delegated permissions are not available and inheritance is automatically
<http://support.microsoft.com/?id=817433>

318180 AdminSDHolder Thread Affects Transitive Members of Distribution Groups
<http://support.microsoft.com/?id=318180>

I am appreciated your time and cooperation. If anything is unclear, please feel free to let me know. I am looking forward to hearing from you.

Best regards,

Nathan Liu (MSFT)
