Hi Jamie,

Thank you for posting in the SBS newsgroup. I am glad to see you again.

According to your description, I understand that you would like to find the SBS removed the email attachments, and allow them through. If I have misunderstood your concern, please don't hesitate to let me know.

Where do we find the SBS removed the email attachments? The Folder location can be specified when we are running the CEICW, in the "Remove E-mail Attachments" page, you can enable the "Save removed e-mail attachments in a folder" option and specify a folder to save these attachments.

How do we manually allow the attachments which we know are safe go through the SBS Server? Please perform the below steps:

1. Open Start, click Run, type %sbsprogramdir%\Networking in the Open box, and then press ENTER.
2. In the dialog box, find the SecAttsConfig.xml file, right-click the file and select Edit.
3. If you would like to enable the "Save removed e-mail attachments in a

Re: SBS removed email attachments. Where to find them, and allow them through.

Re: SBS removed email attachments. Where to find them, and allow them through.

folder" option and specify a folder to save these attachments. Find the <SaveToFile Enabled="False" Location="" /> sentence, change it to <SaveToFile Enabled="True" Location="Destination path" />. For example, we can type c:\attachments at the Destination path.

4. Find the <Attachment Enabled="True" Extension=".mdb" Description="Microsoft Access program" /> sentence, change it to <Attachment Enabled="False" Extension=".mdb" Description="Microsoft Access program" />.

5. Click File in the menu, and then click Save to save the change to the SecAttsConfig.xml file.

I am appreciated your time and cooperation. If anything is unclear, please feel free to let me know. I am looking forward to hearing from you.

Best regards,

Nathan Liu (MSFT)
