Hi,

Thanks for letting us know that my solution works well. If you have any other concerns please feel free to let me know.

I am glad to help you:)

| Thanks Charles

| I have made the changes to my ISA configuration that you suggested. My  
| setting in step one of your suggestion was correct but step two was set  
| to

| "Internet User" not "All User". A simple solution to an aggravating  
| problem!!

| Thanks Again

|> Hi Jeff,

|>

|> Thanks for using SBS newsgroup.

|>

|> Issue description:

|>

|> =====

|> I understand that you want to maintain a remote website which created by  
|> Frontpage through ISA2004 via either web folder or frontpage.

|>

|>

|> Analyzing and suggestions:

|>

|> =====

|>

|> Generally speaking, this issue might be caused by the authentication  
|> setting on ISA; you can refer to my suggestion:

|>

|> 1. Please disable request authentication on ISA to allow the anonymous  
|> access to that website, because as I know by default, ISA will enable  
|> authentication for authorize the user to access internet, when you use  
|> web

|> folder or front page to remote control the website in internet, you may  
|> encountered some problem.

|>

|> A. Open ISA 2004.

|> B. Expand to configuration.

|> C. In the network component, click internal network.

|> D. In the web proxy tab, click authentication.

|> E. Make sure that require all user to authentication is not checked.

|>

|> 2. Please also check your internet access rules on firewall policy, make  
|> sure that it is applied to all user not only the internet user.

|>

|>

|> Hope the above information helpful, if you have any further concerns,  
|> please feel free to let me know. I will be here waiting for your  
|> updates.

=====  
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:  
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.
