Hello Sean,

Thank you for posting to the SBS Newsgroup.

I understand that you have a laptop and always travel between two SBS domains which have exact the same server name. You want to know how to stop synchronize the offline folder when you are in one of the domain2. If I have misunderstood your concern, please let me know.

I have performed a lot of research and testing, and the best way is configure some setting in the Group Policy on the SBS 2K3 server. To do so, please see:

[Note]: I assume that you are the Domain 1 client and the laptop is Domain 1 computer.

1. Go to the SBS 2K3 server in Domain 1.
2. Expand to Group Policy Management\Forest\Domains\Yourdomain.local\Group Policy Objects\Small Business Server Folder Redirection.
3. Click Small Business Server Folder Redirection.
4. On the right pane, click Delegation tab.
5. You will find there are some Groups and users listed under the Delegation tab. You need to highlight each of the Groups/Users and click Properties, go to Member tab to find out what Groups you belong to and remove it.
6. Go to Start -> Run "gpupdate" (without quotation marks). Next time when you login the laptop, the Folder Redirection Group Policy will not apply to your laptop.

Hope this information helps. If anything is unclear, please feel free to let me know. I am looking forward to hearing from you!

RE: Two Servers with Same Name & My Folder Redirection Challenge.

Best regards,

Brandy Nee

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
