Hi Sylvie:
Thanks for your reply!

Yes, you are right. One supplement, if the new hardware is not similar, you can perform a disaster recovery to the spare server, recreate the user accounts and restore the data separately.

Regarding the Licensing question, I suggest you contact the Licensing center for more detailed information.

You can call 1-800-426-9400 (select option 4), Monday through Friday, 6:00 A.M. to 5:30 P.M. (PST) to speak directly to a Microsoft licensing specialist.

Have a nice day! :)

Best Regards
Edward Tian(MSFT)
Microsoft CSS Online Newsgroup Support

Get Secure! – www.microsoft.com/security

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

RE: backup and restore

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

|
| Hi Edward,
| Thank you for your reply, I answer with a little delay as I am in France
and
| I was very busy all day long.
|
| I have read carefully the document, and I understand various things :
|
| 1- if I have a HDD on the network I can restore from it with a direc IP,
so
| my solution of backup must be ok.
| 2- if I restore on the same computer no problem of data or licence.
| 3- if I restore to another computer it is ok only with the same hardware,
| what is nearly impossible to get.
|
| So, is it possible to reinstalling SBS from the CD and just restoring all
| the data (you must know that we have only 7 clients) ?
| and what is permit for the licence when it is an OEM version (case of

RE: backup and restore

RE: backup and restore

theft,

| fire or hardware failure) ?

|

| Again many thanks

|
