Good Morning Crina,

So I understand you ... your asking about port 4125. Does it need to be open or closed?

I have two(2) Nic's / I use a SonicWALL TZ 170 Firewall ( I find to work well with SBS2k3..except this one).

DHCP Server turned of SonicWALL with VPN Pass through request for IP to Server.

Wan access by HTTPS:// (rule set in soniwall)

When I get on the clients site today I try the laptop. Other then that if you thought of anything else, I'll try it. I'll keep you posted.
