Thanks for the help Matt,

1. Yes, have run the wizard.
2. Yes, I can telnet to port 25, at least I think I can, when I do, I get:
220 gtnconsulting.com Microsoft ESMTP MAIL Service, Version:
6.0.3790.211 ready at Fri, 2 Sep 2005 16:43:11 -0400
3. I am sending mail out using a smarthost at DynDns.org as I always have.
Sending is not a problem to the external world, but mail is just not coming in.
