Hello Howard,

Thank you for posting to the SBS Newsgroup.

According to your description, I understand that you want to know how to assign Microsoft Office Outlook 2003 to domain users in the Assign Application Wizard. If I have misunderstood your concern, please do let me know.

Please see my following steps to implement:

1. Expand to Server Management\Standard Management\Client Computers. On the right pane, click Assign Application to Client Computers. Run the Assign Application Wizard.
2. Proceed to the Page of Client Applications, click Edit Applications. You are in the Set Up Client Applications Wizard.
3. Proceed to the page of Available Applications, click Add.
4. In the blank under Location of setup executable for this application, type the following command:  
  

```
"\\Yourdomain\ClientApps\Outlook2003\setup.exe"  
Transforms="\\Yourdomain\Clients\Setup\sbsdefault.mst" /qn  
Reboot=ReallySuppress /wait INSTRALLLOCATION="%location%" /Lv  
"%temp%\verbose.log".
```
5. Finish rest of the Set Up Client Applications Wizard and the Assign Application Wizard.
6. Test the issue again.

=====  
7. If the issue persists, we need to reinstall the Client Deployment in the SBS Integrated setup. Please see the following steps.

8. Go to Control Panel -> Add or Remove Programs -> Change or Remove

RE: How to re-install default available client applications

Programs -> Windows Small Business Server 2003. Click Change/Remove.

9. Run the Microsoft Windows Small Business Server Setup Wizard.

10. Proceed to the page of Component Selection, select Action as Maintenance for Server Tools, Action as Maintenance for Client Deployment. Expand Client Deployment, select Action as Reinstall for Microsoft Office Outlook 2003.

11. Finish rest of the wizard and repeat the steps from Step 1 to 6.

12. Test the issue again.

Hope this information helps. If the issue persists after you perform the steps above, please help to gather the following information for further troubleshooting:

Please explain in detail "I can point the list of client apps to the Outlook installation point, but this will not produce the streamlined and integrated install that usually happens.". I strongly suggest you that capture a screen for us to better understand your issue.

I am appreciated your time! If anything is unclear, please feel free to let me know. I am glad to be of assistance!

Best regards,

Brandy Nee
