ok I have done what the artical has told me told and it worked for the purpose of removing the ras server out of the dns.  
Now however the server can not see the client computers anymore in my network places and the clients can not see the server any more in my network places.  
client can still access the server by typing in the ip address of the server.

ipconfig of the server is as follow

```
C:\Documents and Settings\Administrator>ipconfig /all
```

Windows IP Configuration

```
Host Name . . . . . : breakaway-k1
Primary Dns Suffix . . . . . : perth.breakawayresouces.com.au
Node Type . . . . . : Unknown
IP Routing Enabled. . . . . : Yes
WINS Proxy Enabled. . . . . : Yes
DNS Suffix Search List. . . . . : perth.breakawayresouces.com.au
breakawayresouces.com.au
com.au
```

PPP adapter RAS Server (Dial In) Interface:

```
Connection-specific DNS Suffix . :
Description . . . . . : WAN (PPP/SLIP) Interface
Physical Address. . . . . : 00-53-45-00-00-00
DHCP Enabled. . . . . : No
IP Address. . . . . : 192.168.101.142
Subnet Mask . . . . . : 255.255.255.255
Default Gateway . . . . . :
NetBIOS over Tcpi . . . . . : Disabled
```

Ethernet adapter Local Area Connection:

```
Connection-specific DNS Suffix . :
Description . . . . . : Intel(R) PRO/1000 XT Server Adapter
Physical Address. . . . . : 00-02-B3-C9-CB-9A
```

Re: Group policy does not work

DHCP Enabled. . . . . : No  
IP Address. . . . . : 192.168.101.10  
Subnet Mask . . . . . : 255.255.255.0  
Default Gateway . . . . . : 192.168.101.254  
DNS Servers . . . . . : 192.168.101.10  
NetBIOS over Tcpi. . . . . : Disabled

C:\Documents and Settings\Administrator>

could it be a problem with the wins ?
