Hello Jansen,

Thank you for posting to the SBS Newsgroup.

>From your description, I understand that you want to configure a shared folder permissions so users cannot modify files twice. If I have misunderstood your concern, please let me know.

I have performed many testing on my machine and discussed with colleagues, unfortunately, there is no such native way to do so. This means you need to change users' permissions twice for this shared folder. The first time when users modifying files in the shared folder, you need to grant "Modify", "Write" and "Execute" etc permissions to allow them to create and save files.

After they save the files, you need to change users' permissions on this shared folder immediately. But you cannot predict when they save the files, either you could know when they will try to modify these files again.

Also, you mentioned "they can't change files names", I am not sure how you configured so users cannot rename the files.

Thanks for your time and understanding! If you have questions or concerns, please feel free to let me know. I am looking forward to hearing from you!

Best regards,

Brandy Nee

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

RE: Folders and permisisions

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
