Hi David,

Thanks for your email.

1. For the "Illegal Path Format, error C1034930", please don't configure the Message Tracking Log to be saved in a shared folder as \\Location\tracking.log format. Please save the log to a local folder (such as C:\MessageTracking or C:\Program Files\Exchsrvr\ppsvr1.log) and perform the tracking again.

2. For the "Access is denied, ID no: C0070005", please also verify the permissions on the following registry keys:

HKLM\SYSTEM\ControlSet001\Control\SecurePipeServers\winreg  
HKLM\SYSTEM\ControlSet001\Control\SecurePipeServers\winreg\AllowedPaths

Make sure LOCAL SERVICE should have READ permission on both keys.

After the permission is reset, try again.

More info here:

323915 XADM: "c0070005" Error Message If You Try to Access a Tab in Exchange  
<http://support.microsoft.com/?id=323915>

3. As you mentioned, you are using the local administrator account, please use the Domain Administrator user account or run the Add User Wizard and use the Administrator Template to create a new administrator account to try again.

I appreciate your time and cooperation. If anything is unclear, please feel free to let me know. I am looking forward to hearing from you.

Best regards,

Nathan Liu (MSFT)  
Microsoft CSS Online Newsgroup Support

Get Secure! – [www.microsoft.com/security](http://www.microsoft.com/security)

=====

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
