the NIC properties of the SBS should be manually set, including the DNS entry pointing to itself.

I'd probably set a DHCP reservation for the NT box, but that's in the future for now, it should also have manual entries.

ALL workstations should be set to DHCP eventually, don't change them yet. We first need to ensure SBS is running DHCP.

When replying, please quote (at least some) of the text you are replying to. I tend to trim out a lot unless I think it will be handy in the reply but it's always a good idea to leave a little in.

forget the word 'forwarders' for now.
