Hi Amnon,

Thanks for using SBS 2003 newsgroup!

For your description, I understand that the scheduled jobs can not be implemented in XP computer. If I am off base, please don't hesitate to let me know.

Yes, you are right. The Task Scheduler service should be started with local System account. And its Start type should set as Automatic.

One thing I need to clarify: the method you replace Mstask.exe tool to old tool Atsvc.exe to workaround the issue, it is not dedicated and there is side effect on OS.

The problem seems abnormal. Before going further, please kindly help me collect some information to isolate the issue:

1. Are all scheduled jobs not implemented always or random? Or some specific scheduled job?
2. Does the issue happen on all your XP computers or some specific?
3. Have you applied the latest updates to the windows XP machine? And also ensure you have applied hotfix of 841873. If not, please try to apply it to see if the issue be fixed. You can refer to the following article for detail information:

MS04-022: A vulnerability in Task Scheduler could allow code execution
<http://support.microsoft.com/default.aspx?scid=kb:en-us:841873>

4. If you create a new local user account on the Windows XP computer, does the issue will persist with the new user account that you had created?
5. Please Send me the SchedLgU.Txt in the C:\windows folder
6. What is error message you got when scheduled jobs could not finished? Could you tell me accurate error message or help me catch a screen shot

RE: Scheule issue

when reproduce the issue.

To make a screen shot:

- A. Press Alt + Pr Scrn to capture a screen shot.
- B. From Start, go to Run, enter pbrush in the Open box, and then click OK.
- C. Use Ctrl + V to paste the screen shot to the canvas.
- D. From the File menu, go to Save and save as a JPG file.

7. Could you find related error event in Event Viewer (Start -> Administrative Tools -> Event Viewer) in the SBS server box and the problematic computer? If yes, please paste the detail error information in the newsgroup or mail to me.

8. Please try to perform a clean boot to verify any conflicts of applications.

A Clean Boot will allow us to isolate any device drivers or programs that are loading at startup that may be causing a conflict with other device drivers or programs that are installed in your computer.

- 1) Run MSCONFIG.EXE.
- 2) In the Services tab, click "Hide All Microsoft Services" and click "Disable All".
- 3) In the Startup tab, click "Disable All". Click OK. (This will temporarily prevent third-party programs from running automatically during start-up.)
- 4) Restart the computer and check whether the problem still persists. If the problem does not occur, it indicates that the problem is related to one application or service we have disabled. You can use the MSCONFIG tool again to re-enable the disabled item one by one to find out the culprit.

Please add all files to zip file and mail me at v-yanniw@xxxxxxxxxxxxxx

RE: Scheule issue

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
