1. The authentication issue is when using "[https://\[public ip\]:444](https://[public ip]:444)" to access the companyweb (one of the tests you had me do). When using ":444", I can remotely access the site without any authentication.
2. I have rerun the CEICW many, many, many times. Unlike the missing companyweb option on the screen prints, trust me this time – the Sharepoint option has been selected.
3. I sent the last ICW file to you.
