Hi Charles,

Thanks for your answer.

I changed the limit of MessagesPerSession to 500 and this did the trick.

Now I can retrieve all the emails.

For the future, I'm planning to retrieve emails with SMTP and a MX record.

We receive between 2000 and 15000 returned spam mails a day (spammers using our DN as return adress).

The event log is full of POP3 Connector errors like 1023, 1019, 1035, 1053, 1056, 1036 and 1029.

Thanks,

Geert Geerits
