-

Hi all,

I am installing a fresh copy of Small business Premium on a new Dell Poweredge 2800 server.

The 2nd stage setup fails with the following message – An error occurred while copying files for the Client Deployment.

There was a log produced which I have read over but unfortunately I can't work out what the problem is from the log as there are many errors but I'm not sure which are ok / acceptable and which ones are the showstopper.

I have pasted the log here in the hope someone can tell me what has gone wrong and ideally what to do to sort it out.

Log follows

Best Wishes

Paul Bishop

```
[01/05/06,20:19:09] setup.exe: [2] continue setup link may not work properly. Please relaunch via add remove programs or from CD.

[01/05/06,20:20:09] : [2] Informational check for unused disk space failed.
```

An Error occurred while copying files for the client deployment – H

This is not critical so setup will continue.
