> Best practice is to not use the /3GB switch on SBS.

OK Chief, but err That wizard just told me that best practice was to do it.

Is there any particular reason why not, for SBS ?

>Are you using the SBS backup wizard?

No. Straightforward backup from ntbackup, with it's own little wizard.

> Are your log files being committed and removed after each backup?

Log files ? Backup logfiles or Exchange log files ?

Committed ?

Removed ?

Not sure I follow you but thanks for trying to help me.

Could you be a bit more specific ?

TIA

Garret
