Hi,

Thanks for using the SBS newsgroup.

>From your description, I understand that you want to know if there is some application can control bandwidth and usage quota.

Based on my research, there is not bandwidth control utility in Microsoft products. I have confirmed from the Product Group. Currently, they are working with our partner offering for bandwidth control solutions. There will be the bandwidth control solution for ISA 2004 in the future.

I have also performed the research in Internet and I found a third party hardware which can control bandwidth:

<http://www.packeteer.com>

The white paper

<http://www.packeteer.com/resources/prod-sol/ControlDrillDown.pdf>

Packeteer controls bandwidth allocation with flexible policies to protect critical applications, pace greedy traffic, limit recreational usage, and block malicious activity. Bandwidth minimums and/or maximums apply to each application, session, user, and/or location.

NOTE: This response contains a reference to a third party World Wide Web site. Microsoft is providing this information as a convenience to you. Microsoft does not control these sites and has not tested any software or information found on these sites; therefore, Microsoft cannot make any representations regarding the quality, safety, or suitability of any software or information found there. There are inherent dangers in the use of any software found on the Internet, and Microsoft cautions you to make sure that you completely understand the risk before retrieving any software from the Internet.

Hope it may be helpful. Please let me know if you have any concerns on the

RE: SBS2003 Premium client bandwidth and usage quota

issue. I am happy to be of assistance to you-).

Have a nice day!

Sincerely,

Jenny Wu

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
