One more test. Can you or anyone else log onto the domain from the workstation? If yes I would be leaning towards a corrupt profile. Delete the old one, make sure you save her desktop and documents and recreate a new one next logon. Delete the profile from right click My Computer/Properties/Advance/User Profiles Settings.

The user account is not locked out. The user is able to logon to other workstations in the domain. No the user has not recently changed password and lastly the user never logs in on any other workstation so simultaneous multiple client sessions can be ruled out also.

When you checked was the user account locked out? Can they log onto another machine? Has the user recently change their password? Perhaps they were still logged in elsewhere when they did?

I wish it were that obvious and easy. Of course I have checked the user account. The user logs in every day. The bulk of the events are occurring during off hours when the user is not present?

I am running SBS 2003 Sp1 with all XP pro clients. One of the clients has suddenly started causing security event 529 as well as a netlogon failure event 5722. I have tried deleting machine from domain and rejoining and it did not solve issueThe logs shows the following:

```
Source Event ID Last Occurrence Total Occurrences
Security 529 2/3/2006 5:23 AM 26 *
Logon Failure:
Reason: Unknown user name or bad password
User Name: JeanHinsley
Domain: BCCIPDC
Logon Type: 3
Logon Process: NtLmSsp
Authentication Package: NTLM
Workstation Name: BCCIJHINSLEY
Caller User Name: -
Caller Domain: -
Caller Logon ID: -
Caller Process ID: -
Transited Services: -
Source Network Address: 192.168.0.33
Source Port: 3391
```

```
Source Event ID Last Occurrence Total Occurrences
NETLOGON 5722 2/3/2006 4:25 AM 6 *
```

The session setup from the computer BCCIJHINSLEY failed to authenticate.
The name(s) of the account(s) referenced in the

Re: Authentication failures

security database is
BCCIJHINSLEY\$. The following error
occurred: Access is denied.

Thanks in advance for your help...
