I am having a problem with SPAMBLAZE & SORBS spam lists.

My ISP is BT (British Telecom) and SORBS accidently put their entire range of static IP addresses on the dynamic list... therefore anyone using SORBS lists does not receive our mail.

BT have been on to them but they are being unforgivably slow, removing one or two IPs a day when there are hundreds that THEY have incorrectly listed.

They are just hiding behind thier website and are impossible to get any sense out of. Does anyone know of an Internet body I can go to to complain about this. From what I have heard SORBS is run my a group of volunteers from AUS, please correct me if I am wrong.

I just find it unbelievable that they could so easially block so many UK companies from sending mail.

Thanks

Chris

Apparently, a "domain grabber" listed that domain with a "wildcard DNS"

Re: all incoming mail is being blocked

record and caused all the trouble. Don't ask...I don't know exactly what that means.

Whether it was right or not, "dsn.rdc-ignorant.org" has been on my RBL list for months and months without any problem until yesterday. That is when it started rejecting all incoming mail.

We are running SBS2003 Premium and hosting our own mail server. Right now, every incoming message is being returned as undeliverable with a message such as this:

Remote host said: 550 5.7.1 66.163.178.108 has been blocked by dsn.rdc-ignorant.org

There is no dsn.rdc-ignorant.org
It's a typo!
It must be "dsn.rfc-ignorant.org" (f instead of d)

So whoever's server uses dsn.rdc-ignorant.org will REJECT ALL MAIL, since dsn.rdc-ignorant.org has a wildcard address record, see:

host foobar.de.dsn.rdc-ignorant.org
foobar.de.dsn.rdc-ignorant.org has address 64.20.43.107

Re: all incoming mail is being blocked

```
# host aol.com.dsn.rdc-ignorant.org
aol.com.dsn.rdc-ignorant.org has address
66.45.225.11
```

I've visited the
<http://www.rfc-ignorant.org/>
website, but I don't
really understand what is
wrong.

rfc-ignorant.org != rdc-ignorant.org
