OK here's what I did

- Exported all task to a PST
- Deleted all the tasks and closed Outlook
- Open Outlook created some test Tasks with reminders some that are already overdue and some set to next year
- Closed Outlook and open it again

Its working fine, I imported the old tasks again but I just noticed that a lot of those tasks that appears have "Recurrence" set I only found two that has not got that set. Is this the default behavior of "Recurrence" that it displays the task in the reminder window even if it is due in 22 weeks?

.
