You receive a "Server Error in '/' Application. Access to the path <path> is denied" error message when you log on to Windows SharePoint Services
<http://support.microsoft.com/kb/823379>

When I run "Backup" from "Server Management" I receive the following error.
I receive a similiar error from "Monitoring and Reporting". I can not access "Companyweb" either. I know they are all coming from DNS and or IIS but I just can't find the correct solution. I have limited knowledge so be patient with me.

Server Error in '/Backup' Application.

Compilation Error

Description: An error occurred during the compilation of a resource required to service this request. Please review the following specific error details and modify your source code appropriately.

Compiler Error Message: CS0016: Could not write to output file 'c:\WINNT\Microsoft.NET\Framework\v1.1.4322\Temporary ASP.NET Files\backup\55b79170\2502a0a\yctowcxc.dll' --- 'Access is denied.'
