Hi,

Tried both, still doesn't map my remote drives anymore. Weird that it works when connecting to client workstations?

The group policy settings are all set to 'Not configured' for the terminal services settings.

Will it write an error out to any log files if it has a problem connecting?

Thanks  
Tristan

Hi Tristan,

Thank you for posting in SBS newsgroup.

From the description, do you mean local drives are not displayed in My Computer on SBS if you do as following?

1. Open RWW on remote client computer and then logon.
2. Click to connect to Server Desktops or Client Desktops and then highlight server computer or client computer on the computer list page and click Optional Settings.
3. Check Enable files or folders to be transferred between the remote computer and this computer.
4. Click Connect and then check Connect your local disk drive to the remote computer.
5. Click Ok and then click My Computer on SBS and you can not find the local drive.

Re: Remote Web Workplace, disk drives not showing

If so, it may be caused by the group policy on SBS. We can check as following:

1. Open Group Policy Management on Administrative Tools and then expand Forest | Domains | server.local | Domain Controllers.
2. Right click Default Domain Controller Policy and select Edit.
3. Expand Computer Configuration\Administrative Templates\Windows Components\Terminal Services\Client/Server data redirection.
4. Check if you have enabled 'Do not allow driver redirection' on the right pane.

I appreciate your time and look forward to hearing from you.

Best regards,

Crina Li (MSFT)

|  
| Hi,  
|  
| When I connect to server remotely using Remote Web Workplace and choose  
| the  
| options to connect my local drives, my local drives are no longer  
| showing  
| in  
| my computer. I can't find any errors related in Event Viewer on the  
| server  
| or my local machine. So I'm a bit stuck with what is going wrong.  
|  
| If I remote into a workstation instead of the server, I can see my local  
| drives as expected.  
|  
| Any ideas?  
| Thanks  
| Tristan
