Could be..

I tried W32TM /resync on a workstation and got "ther computer did not resync because no time data was available"

I might have an issue with the SBS Time Service. I checked that it is started, the firewall settings have not been altered recently.

"Maxibo" <totallyanon@xxxxxxxx> wrote in message news:erXw5NjaGHA.508@xxxxxxxxxxxxxxxxxxxxxxxxxxxx

Hi Terry, I can only say that when I had these issues it was related to time syncing... 2 pcs were not in sysnc with the server...

"Terry M" <terrym@xxxxxxxxxxxxxxxxxxxxx> wrote in message [news:O\\$\\$taDiaGHA.1348@xxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:news:O$$taDiaGHA.1348@xxxxxxxxxxxxxxxxxxxxxxxxxxxx)

I have a fully patched SBS Prem box SP1 without ISA. I use Trend CSM, and we using a Symantec Corporate Firewall.

I am logging hundreds of NT AUTHORITY\SYSTEM Logon failures from my workstations like seen below.

They generally come in groups of four, for the same workstation with different Source Ports. All workstation seem to be getting triggering the same event with different Source Port #'s.

I recently did a hard drive upgrade and restored the Server from backup.

I

did my SBS SP1 at that time.

Everything in the network seems to be working fine, my Trend AV scans did not find anything. I have an issue with my XP laptop giving me a "applnch.exe – Entry Point Not Found" but I did not think this was

Re: Another Event 529

related.

Any ideas as to what is going on here?

Thanks

Terry Mc
