M,

The page cannot be displayed
The page you are looking for is currently unavailable. The Web site might be experiencing technical difficulties, or you may need to adjust your browser settings.

Please try the following:

Click the Refresh button, or try again later.

If you typed the page address in the Address bar, make sure that it is spelled correctly.

To check your connection settings, click the Tools menu, and then click Internet Options. On the Connections tab, click Settings. The settings should match those provided by your local area network (LAN) administrator or

Re: Please Help No good backup & Companyweb Down.....

Internet service provider (ISP).

See if your Internet connection settings are being detected. You can set Microsoft Windows to examine your network and automatically discover network connection settings (if your network administrator has enabled this setting).

Click the Tools menu, and then click Internet Options.

On the Connections tab, click LAN Settings.

Select Automatically detect settings, and then click OK.

Some sites require 128-bit connection security. Click the Help menu and then

click About Internet Explorer to determine what strength security you have installed.

If you are trying to reach a secure site, make sure your Security settings can support it. Click the Tools menu, and then click Internet Options. On the

Advanced tab, scroll to the Security section and check settings for SSL 2.0,

SSL 3.0, TLS 1.0, PCT 1.0.

Click the Back button to try another link.

Cannot find server or DNS Error
Internet Explorer

this is it....DKS

I have been working on this
issue for 5 days now. Our
companyweb is
completely down you can
not access it from the server
or any other
nodes.
All
access to the server
management windows are
down too because
companyweb
can
not be accessed... I have
tried to reinstall the
directories no
hope. i
thought it was a DNS
problem but I can ping the
companyweb and it

Re: Please Help No good backup & Companyweb Down.....

does
return
with the internal server ip
address. We have tons of
leads and
company
generated articles we have
to retrieve. The last backup
was March 12
but
every time I try to restore
the data it comes back with
data cannot
be
encrypted. I tried to take a
couple steps back and see
where we went
wrong.... We uploaded a
new site to the wrong folder
in the iis and
companyweb has lost its
main page and there are no
files inside the
companyweb to get to the
main sharepoint site I need
to reinstall
these
files.
I do not have a backup. I
know the data is still there
in the
sharepoint
folders. The Internal Site
Configuration page still
comes up and I
can
make
some configuration changes.
Please help I need to
reinstall the
companyweb
folder in the IIS / wwwroot
file.... Where do I retrieve the
correct
files
to
place in these folders?
D

Re: Please Help No good backup & Companyweb Down.....

Merv,

thanks for response I removed and reinstalled the sharpoin
services
website
but still no companyweb.. I download all the nessary
updates. I can
ping
companyweb and get the server Ip response... But still no
companyweb..
any
suggestions?

DKS
