Hi Maxime,

Thanks for using the SBS newsgroup.

Can I confirm with you that you want to know how to configure fax notifications when faxes are received even there is not Exchange server installed? If I am off base, please don't hesitate to let me know.

If there is no Exchange server installed and we still need configure fax notification, we can use Messenger service to send notification. We need configure as follows:

1. Open Server Management console, locate the Fax (Local) node.
2. Right click it to open its Properties page, under Receipts tab, ensure the option "Enable message boxes as receipts" is checked.
3. Restart the "Fax" service to take effect the changes.
4. Please ensure the Messenger service is running on both the SBS server and all the client computers. You can refer to below steps to check:
 - 1). On both the SBS server and the client computers that cannot receive the notification, click Start->Run, type "services.msc" (without the quotes) and click OK.
 - 2). Double click the Messenger service to bring up its properties page. Change its Startup type to "Automatic".
5. Please ensure that the SBS server's internal network adapter and the clients' network adapters are enabled NetBIOS over TCP/IP. To check this, perform the following steps:
 - 1). Right click My Network Places and choose Properties.
 - 2). Right click your local area connection and choose Properties.
 - 3). Highlight "Internet Protocol (TCP/IP)" and click Properties.

- 4). Click the Advanced button and then click the WINS tab.
- 5). Make sure "Enable NetBIOS over TCP/IP" is selected.

Then you can receive fax notification.

Hope above information helps! I am happy to be of assistance to you and look forward to your reply.

Have a nice day!

Sincerely,

Jenny Wu

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

I'm using the Fax services on my SBS2003 domain without Exchange.

Can I generate Hard Evidend Sended Reports? I need to know and rapport

which

fax has been send to which addressee

if there is any link regarding which explains this procedure please send

to

me on following email:
max_coulon@xxxxxxxxxxxx

.
