Do you mean the administrative tools / services on the server? Yes, that service is started.

We do use trend micro Client Server Security Agent (prog version 7.2).

Hi again.

Seems now we have problems with the new user accounts somehow. We use roaming profiles, but after they have been created, they stop working when the users log. They get error message saying it cannot locate the roaming profile, and will log on with a temp profile.

Can this have to do with the exchange problem we had? Exchange seems otherwise to be working fine now.

Get these warnings (not errors) in the event log:

1:

Event Type: Warning
Event Source: MExchangeIS Mailbox Store
Event Category: MTA Connections
Event ID: 2000

Re: Problem creating new exchange mailbox

Description:

A provider, PerfProv, has been registered in the WMI namespace, ROOT\CIMV2\MicrosoftHealthMonitor\PerfMon, but did not specify the HostingModel property. This provider will be run using the LocalSystem account. This account is privileged and the provider may cause a security violation if it does not correctly impersonate user requests. Ensure that provider has been reviewed for security behavior and update the HostingModel property of the provider registration to an account with the least privileges possible for the required functionality.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Could there be a connection?

Thanks for all help:)

That should work. It sounds like the original exchange accounts were linked to the Recovery Storage Group which has now been deleted, so recreating those accounts now should place the Exchange mailboxes correctly under in the First Storage Group.

No, I did not use that method. But I have already deleted the Recovery Storage Group.

&g ; not a real big problem to create new accounts, since its only a few,

and
we have not

Re: Problem creating new exchange mailbox

migrated the users from pop3 to exchange yet. Thats the next step.

Will that method work since I have deleted that group?

Hurray.

When i create a new user, it now gets an exchange account.
Thanks.

A litte minor issue:
When I moved the exchange box from recovery storage group to

Re: Problem creating new exchange mailbox

first
storage
group for
existing
users, they
didn't get an
account in
first
storage
group, even
though
properties
of the user
says that it
is stored in
the right
place. No
mailbox
item shows
up.

Do you
know the
cause of
this? Or do
I have to
recreate the
users
for
them
to
get an
exchange
account?

Here's
some
more
news:

On
a
new
user
created,
under
properties
-
Exchange
General
-
Mailbox
store,
the
path
is:
QSRV02/Recovery
Storage
Group/Mailbox
Store
(QSRV02).

Re: Problem creating new exchange mailbox

When
this
user
was
created,
it
did
NOT
get
an
exchange
account.

Under
properties
(same
place)
on
and
OLD
user(created
before
I
moved
the
database)
with
an
exchange
account
that
works,
the
path
is
the
following:
QSRV02/First
Storage
Group/Mailbox
Store
(QSRV02).

As
you
can
see,
these
paths
are
not

Re: Problem creating new exchange mailbox

the
same.

Can
this
be
the
problem?
Did
I
do
something
wrong
or
not
complete
some
steps
in
moving
the
database?
