Thanks for posting here.

I recommend you to open a new thread for further discussion. A support engineer will be assigned (maybe it will be me again).

Thank you for your understanding and we look forward to hearing from you soon.

At this point, I'm not sure whether the 2 problems are related, Based on my research, This can occur if you have a certificate bound to the default website, you have required SSL on the exadmin virtual directory, and the certificate common name does not contain the FQDN of the server name that IIS is installed on.

To resolve this issue, remove the certificate from the default website and request a new certificate that contains a common name of the FQDN of the server.(not IP address)

Thanks for your time!

Best Regards,

Chace Zhang (MSFT)

Re: public folders snap-in is hanging mmc.exe

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
