> I was given the wrong spelling for a users account and now they want me to correct it. I tried changing the name in AD and it worked but it did not correct the GAL and I can't find a way to edit the GAL.

You don't edit the GAL. The GAL is a listing of your AD mail−enabled objects, essentially.

> Am I missing somethin or is there a tool? It's the first hame that is spelled wrong (Lori instead of Lory) but we only use First Initial, Last Name; but the user doesn't want to leave it so I have to correct it now.

> Thanks, David.

Change the user's account properties − first name, display name, and the alias. The offline address book will be automatically updated or you can force it....then the cached mode clients will eventually see the new OAB (offline address book).

You may also want to modify her Outlook profile (control panel, mail) − modify the Exchange account properties by letting it resolve to the new display name.
