Hello David,

Thank you for posting back! Sorry to keep you waiting since I was sick yesterday.

It appears that this issue/question is in regard a non-English version of the product. Please understand that this Newsgroup is provided for English version support only.

Please visit our Worldwide sites support page and find support resources that are provided. You can find your worldwide site here:
<https://partner.microsoft.com/global/30000104>

Having said that, I also would like to provide following information for you:

How To Restore a User Profile in Windows Server 2003
<http://support.microsoft.com/kb/324734/>

How to restore a user profile in Windows 2000
<http://support.microsoft.com/?id=314045>

How to copy data from a corrupted user profile to a new profile
<http://support.microsoft.com/?id=811151>

Thanks a lot for your time and understanding!

Best regards,

Brandy Nee

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner.

Re: Restore SBS 2003 in different HW

You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

Yes, I have one :-)

How can I re-connect each Client PC with the "new" SBS Domain without

loose

the user profile?

(remember: each PC is in a domain with name that match new SBS domain,

but

each user isn't recognized by SBS server – as show in System event viewer:

NETLOGON 5723

Impossibile stabilire la sessione dal computer 'PCERMANNNO'. Il database

di

protezione non contiene l'account di trust 'PCERMANNNO\$' a cui il computer specificato fa riferimento.

RIMEDIO

Se questo Ã il primo caso in cui si verifica l'evento nel computer e per l'account specificati, si tratta probabilmente di un problema temporaneo

che

per ora non richiede alcun intervento. Diversamente, Ã possibile tentare

di

risolvere il problema nel modo seguente:

Se 'PCERMANNNO\$' Ã un account computer legittimo per il computer

'PCERMANNNO',

Re: Restore SBS 2003 in different HW

aggiungere nuovamente 'PCERMANNNO' al dominio.

Se 'PCERMANNNO\$' Ã un account di trust tra domini legittimo, ricreare il trust.

In caso contrario, supponendo che 'PCERMANNNO\$' non Ã un account legittimo,

intervenire nel modo seguente in 'PCERMANNNO':

Se 'PCERMANNNO' Ã un controller di dominio, eliminare il trust associato

a

'PCERMANNNO\$'.

Se 'PCERMANNNO' non Ã un controller di dominio, separarlo dal dominio.

Per ulteriori informazioni, consultare la Guida in linea e supporto

tecnico

all'indirizzo <http://go.microsoft.com/fwlink/events.asp>.

)

With Client migration wizard a warning message advise that client pc is already in domain (!?) and the only profile the wizard found to migrate

is

"Administrator", because the old user domain profile is not in "local

profile

list"...

:(a bit complicate to explain.

I'll try to create a local user profile named as domain user profile, regedit the key that says the path of the profile and redirect to old

domain

profile, then put the client pc to a workgroup, and rejoin domain with

wizard

Re: Restore SBS 2003 in different HW

or by "hand"...

But if you have a "shorter way"...

Thanks a lot for support.
