Hi bass_player

The reason I asked here is that it works fine on other server except SBS 2003 standard.

I dont think this is the appropriate thread to post. Check out <http://forums.asp.net>

Just to answer your question, looks like your error has something to do with your code. You are trying to use an object which has not yet been created – probably missed the New keyword on your code.

Hi

I just made a new website in ISS and when I try to access the site I get tihis:

Server Error in '/' Application.

Object reference not set to an instance of an object.
Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about

RE: New website in ISS

the error and where it originated in the code.

Exception Details: System.NullReferenceException: Object reference not set to an instance of an object.

Source Error:

An unhandled exception was generated during the execution of the current web request. Information regarding the origin and location of the exception can be identified using the exception stack trace below.

Stack Trace:

```
[NullReferenceException: Object reference not set to an instance of an object.]
BIS.NET._default.Page_Load(Object sender, EventArgs e)
System.Web.UI.Control.OnLoad(EventArgs e) +67
System.Web.UI.Control.LoadRecursive() +35
System.Web.UI.Page.ProcessRequestMain() +750
```

Version Information: Microsoft .NET Framework Version:1.1.4322.2300;
ASP.NET
Version:1.1.4322.2300

This ASP app uses a jet database to store information.

Could someone plz help me fix this so it will work?

I tried to sett it as http://<domain>
