Hi Guitarded,

Thanks for posting here.

From the description, it is sharepoint related issue. I would like to suggest that you post the question into Sharepoint newsgroup. You can visit the following link to sharepoint newsgroup:

<http://www.microsoft.com/technet/community/newsgroups/server/sharepoint.mspx>

The reason why we recommend posting appropriately is you will get the most dedicated pool of respondents, and other partners who the newsgroups regularly can either share their knowledge or learn from your interaction with us. Also, this is to make sure that the responders can better track the problem. Thank you for your understanding.

Have a nice day!

Sincerely,

Jenny Wu (MSFT)

Jenny,

I have racked my brain over this. If I change the user permissions to
anything higher than "User" than everything automatically get's approved

no

matter what I change in the User permissions in Sharepoint. If I have
anything less than a "Power User" When I try to add anything to the

Intranet

page a logon screen pops up and will not accept the user name and password

RE: Sharepoint approval

RE: Sharepoint approval

as

eligible to logon. What else could be going on other than what you have previously listed?

""Jenny wu [MSFT]"" wrote:

Hi Dave,

Thanks for posting here!

For your description, I understand that after you upgraded the server to SP1, although you have set document library to require content approval, the uploaded documents are approved automatically.

Content approval allows you to create a list or library where any items

or

files that are submitted by users are not visible to all site users

until

the items or files have been approved by a site administrator or a user belonging to a site group with the Manage Lists right. Users can view a list of the items that they submit and check approval statuses. Administrators and users with the Manage Lists right use the

Approve/reject

items view of the list or library to set an item or file to approved, rejected, or pending. They can also enter comments regarding their decisions.

Submissions by site administrators or users with the Manage Lists right

are

automatically approved. However, other administrators or users with the Manage Lists right can still reject the items.

I would like to suggest you check the following settings to try to find cause:

1. Please check if your team members are site administrators or users

with

RE: Sharepoint approval

the Manage Lists right.

2. Please check if you have anonymous access set for this site and have specified that anonymous has Contributor rights (default is Reader) or

that

in your case "Reader" has been amended to allow it to "add content".

3. Please check the status of these uploaded documents. In the document library, hover over a document and click the down arrow to bring the

drop

down menu, and then select "View Properties". Is "Approved" displayed in the "Approval Status" area?

If the document status is "Approved", most likely, the owner submitting

the

documents has site administrator permission or at least the Manage Lists right. In this case, the documents are automatically approved. Would you double check the permissions of the users and the groups containing them?

In case the Approval status of the documents are not "Approved", the content approval feature should be working fine. Please note that the following users can still see the documents before approval.

- Administrators
- Users with the Manage Lists right
- The user that submit the documents.

If all these settings are correct, I suggest you create a new user

account

and with limited permissions to test the feature, how about the result?

Hope above information help! If you have any question on the issue

please

let me know. I am happy to be assistance of you!

Have a nice day!

Sincerely,

Jenny Wu

=====
This newsgroup only focuses on SBS technical issues. If you have issues

RE: Sharepoint approval

regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner.

You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the

"Notify me of replies" box to receive e-mail notifications when there are

any updates in your thread. When responding to posts via your newsreader,

please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In

doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly.

Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

I am having a problem with share point approvals. This worked fine

before

installing SBS SP1. Now when anyone submits a document it

automatically

is

approved. I have verified that the flag for approval required is still

set.

I have lowered all permissions to reader but it still approves all

documents.

RE: Sharepoint approval

RE: Sharepoint approval

Any ideas?

Thks
