Hi John,

Thanks for your update. I appreciate your time and efforts to the issue.

Based in my research, there is no access policy configured to manage the SMTP traffic in ISA 2000. And also the ISA 2000 server can not control internal traffic between client computers and the SBS server in LAN.

When the issue happened, please run the following command "net stop isactrl" to stop the ISA services and then restart them to see if the issue resolved.

For test aim, I also suggest that you disable all third party anti-virus/spam software on the SBS server to check if the issue happens.

Please let me know if there is any update to the problem in your end.

Have a nice day!

Sincerely,

Jenny Wu

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner.

You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we

RE: DHCp Problems Post SP1

provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
