

Re: Importing messages from .pst file to Exchange mailbox store

ran the
Exmerge program which then allowed the transaction to happen.

Thanks for your response.

Hello,

I am trying to restore some email messages
from a backup. I have
managed
to
mount the recovery storage group store and
export the mail into a
.pst file.
The problem I am now having is trying to
import the messages into
the Exchange mailbox store from the .pst file
using Exmerge.

I have verified that the Microsoft Exchange
Information Store
service is
running but I am not sure how to check if I
have the correct
permissions
to
log on (error code(0x8004011d)).

This is a copy of the log file relevant to the
transaction.

Thanks for your help.

Peter
