Hi Crina,

I'll be reading carefully all the information sended.

In the mean time i've areday tried to rerun the CEICW and it gives an error on the applying of the Firewall Rules. I wonder if there is a problem in ISA Server. Has remote desktop stopped working too, i had to remotely install a vnc tool to be able to access the server, luckily the vpn server is working and i wa able to access a second server and work using that one.

In the next day i'll be near that server and i was thinking to try to do a repair on it. But has i said before, i'll read first all the info you sent and try to apply it.

Thanks for the support.

Best regards,
Fernando

Crina Li wrote:

Hi Fernando,

Thanks for your update.

From current situation, please try to rerun CEICW to see how thing goes.

If it does not work, the best way should be restoring the IIS settings from the backup. If you do not have backup, you may need to back up your server and then follow KB article 887305 to reinstall IIS:

887305 How to reinstall Internet Information Services 6.0 in Windows Small
<http://support.microsoft.com/?id=887305>

This can restore your Web sites without reinstalling your SBS 2003 server.

Additional information:

Backing Up and Restoring Windows Small Business Server 2003
<http://www.microsoft.com/technet/prodtechnol/sbs/2003/maintain/bkuprstr.mspx>

Re: IIS Stopped working properly.

Also, reinstalling SBS IIS needs special care and only could be assisted at our CSS service.

829113 How to restore a Windows SharePoint Services CompanyWeb database after
<http://support.microsoft.com/?id=829113>

Thanks for your time and I look forward to hearing from you.

Best regards,

Crina Li (MSFT)

Microsoft CSS Online Newsgroup Support

Get Secure! – www.microsoft.com/security

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

|| Hi Crina,
|| I've tried those stop/start commands in both IISADMIN and W3SVC and
|| all i got is this message:
|| The requested pause, continue, or stop is not valid for this service.
|| So i manually killed the processes and made them start. That didn't | changed anything.
|| Responding to the questions:
|| 1. The Default web site all the other ones, companyweb and so on are | stopped. Also all the
application pools.
|| 2. I receive that error when i try to start any aplication pool or any | of the web sites.
|| 3. No i can't start the default web site.
|| 4. Yes, FTP is the only thing i can star/stop inside the IIS admin console.
|| 5.I tried the step of collection information, but it doesn't produce any | logs.
| For example inside the W3SVC1 folder that corresponds to the default web | site the last log
file there is from 2 days ago.
|| Thank you for the help.
|| Best Regards,
| Fernando
