Hello Customer,

Thank you for posting here.

Please understand that our newsgroup is an issue based service, meaning we usually respond to one question/issue per post. This will lessen the confusion for both of us, as well as ensure that our results are accurate and not a result of a test for a different question. Therefore, I will work with you on the first question in this post (the printer issue). Regarding the additional question, after we resolved the first question, I will follow it.

Before we go any further, please let me know the following information so that we can understand your situation more clearly.

1. As you mention "I have about 5 network printers that as far I knew always came over when adding new users to the SBS network." What does that mean exactly?
2. If the new account cannot use network printers when first logon SBS Domain?
3. Can these new accounts use network printers after manually add the printers?
4. What OS of client computer is?
5. If all new accounts cannot use all these 5 network printers?
6. Can other old accounts use the 5 network printers?
7. Is there any error message received when you try to use the network printers?
8. Is there any firewall between clients and printers?
9. Is there any Group Policy about printers or client computers on SBS server?

RE: Launching a New user

I appreciate your time and look forward to hearing from you.

Thanks and have a nice day!

Best regards,

Terence Liu(MSFT)

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

| When i jsut configured a new user from my SBS 2003 SP network. I noticed that

| it didn;t bring over a couple of things. For (1) it never brought over my printers. I have about 5 network printers that as far i knew always came over

| when adding new users to the SBS network. Can i check something or what happend. (2) I noticed that when i create the new account it didn't create a

| home file path. What would be going on with this issue?

| Please if possible could someone explain these strange things.

|
