Hi Neil,

Thanks for updating.

Since you have no option to reinstall Monitoring component, please take the following steps:

1. Uninstall the SBS Monitoring component

- 1) Click Start, click Control Panel, and then click Add or Remove Programs.
- 2) Select Windows Small Business Server 2003 and then click Change/Remove. The Setup Wizard appears.
- 3) Click Next to start the wizard.
- 4) On the Windows Configuration page, click Next.
- 5) On the Component Selection page, in the Action column, change Server Tools to Maintenance, change Monitoring component to Remove, and then click Next.
- 6) On the Component Summary page, click Next.
- 7) Click Finish.

2. Delete Registry Keys

- 1) Delete
HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\SmallBusinessServer\Monitoring
- 2) Delete HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Microsoft SQL Server\SBSMONITORING

3. Delete IIS Virtual Directory

- 1) Open IIS, expand servername, Web Sites, Default Web Site
- 2) Delete Monitoring

4. Rename Folders

- 1) Rename C:\Program Files\Microsoft SQL Server\MSSQL\$SBSMONITORING to MSSQL\$SBSMONITORING.OLD
- 2) Rename C:\inetpub\monitoring to monitoring.old

Re: Server Usage Report

5. Reboot the server, and install the Monitoring component

- 1) In Add or Remove Programs, select Windows Small Business Server 2003 and then click Change/Remove. The Setup Wizard appears.
- 2) Click Next.
- 3) On the Windows Configuration page, click Next.
- 4) On the Component Selection page, in the Action column, change Server Tools to Maintenance, change Monitoring component to Install, and then click Next.
- 5) On the Logon Information page, click Next.
- 6) On the Component Summary page, click Next.
- 7) Click Finish.

6. Let's re-run the CEICW as well.

Note: The original performance and usage data may be lost.

Please also ignore the prompted information and continue the process.

After this action, please monitor the system for some time and see if the problem can be resolved.

If you need further assistance, please don't hesitate to let me know.

Best regards,

Robert Li(MSFT)

Microsoft CSS Online Newsgroup Support

Get Secure! – www.microsoft.com/security

=====

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner.

You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

Re: Server Usage Report

Re: Server Usage Report

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
