Hi Robert,

The only difference I could see was "anonymous" access on /Exadmin

I restarted IIS and have requested the users to tell me if they have issues.

However, immediately I see a 3005 error in the event log for one user. The error says I should check the users mailbox is ok.. I know this particular user has 2000+ contacts in his contact list, and I wonder if some of these contacts may cause this error – is this possible?

I should have some more feedback tomorrow, and I'll email any new logs if required.

Thanks,

Adrian

Robert Li [MSFT] wrote:

Hi Adrian,

Thanks for updating.

I am sorry for the delay due to not in office for a few days.

After researching the IIS MetaBase and logs, I found there are some difference in the virtual directory setting between your server and my test machine. The IIS status code 401 is caused by the authentication methods. Please check the following:

1. Open IIS Manager
2. Open properties of the following virtual directories.
3. Select Directory Security tab
4. Select Edit in Authentication and access control box. Check the following:

Re: IIS logs for Exchange/OMA Access

/exchange-oma
Authentication Methods
Enabled Basic authentication
Enabled Integrated Windows authentication
Disabled anonymous access

/OMA virtual directory and Microsoft-Server-ActiveSync virtual directory:
Authentication Methods
Uncheck Enable anonymous access
Uncheck Integrated Windows authentication
Check Basic authentication

/Exchange
Authentication Methods
Enabled Basic authentication
Enabled Integrated Windows authentication
Disabled anonymous access

/Exadmin
Authentication Methods
Disabled Basic authentication
Enable Integrated Windows authentication
Disable anonymous access

/ExchWeb
Authentication Methods
Disabled Basic authentication
Disabled Integrated Windows authentication
Enable anonymous access

When please keep monitoring to see if the problem can be resolved.

If you need further assistance, please don't hesitate to let me know.

Best regards,

Robert Li(MSFT)

Re: IIS logs for Exchange/OMA Access

◇ ◇ 1) On Exchange Server, open IIS MMC, right click Default Web Site and then

◇ ◇ click Properties.

◇ ◇ 2) Click Website tab and then check Enable logging

◇ ◇ 3) Stop the Default Website and RENAME the existing IIS log files under

◇ ◇ C:\WINDOWS\system32\LogFiles\W3SVC1.

◇ ◇ 4) Restart the Default Website and reproduce the problem, which will generate new IIS log file with the exact error.

◇ ◇ 5). Go to the following folder on Exchange Server:

◇ ◇ C:\WINDOWS\system32\LogFiles\W3SVC

◇ ◇

◇ ◇ 2. Collect IIS Metabase

◇ ◇ 1) On Exchange Server, install .NET Framework Version 1.1:

◇ ◇

◇

[http://www.microsoft.com/downloads/details.aspx?FamilyID=262d25e3-f589-4842-](http://www.microsoft.com/downloads/details.aspx?FamilyID=262d25e3-f589-4842-8157-034d1e7cf3a3&DisplayLang=en)

◇ ◇ 8157-034d1e7cf3a3&DisplayLang=en.

◇ ◇ 2) Install MBExplorer by installing IIS 6 Resource Kit Tools:

◇ ◇

◇

[http://www.microsoft.com/downloads/details.aspx?FamilyId=56FC92EE-A71A-4C73-](http://www.microsoft.com/downloads/details.aspx?FamilyId=56FC92EE-A71A-4C73-B628-ADE629C89499&displaylang=en)

◇ ◇ B628-ADE629C89499&displaylang=en.

◇ ◇ 3) Once it is installed, access it from Start, Programs, IIS

Resources,

◇ ◇ Metabase Explorer.

◇ ◇ 4) In the left pane, right click "LM" (under your server computer name)

◇ ◇ to choose "Export to file", and then save it as IIS.mbk.

◇ ◇ 5) Compress this mbk file and send it to me for analysis. Please let me

◇ ◇ know the password if you set on this iis mbk file.

◇ ◇

◇ ◇ Please send the information to v-robali@xxxxxxxxxxxxxx with subject:

◇ ◇ 37643242-IIS logs for Exchange/OMA Access.

◇ ◇

◇ ◇ I am looking forward to here from you.
