Hi Robert,

Thank you for your reply. I tried it but I got a permission error:

Your message did not reach some or all of the intended recipients.

Subject: test

Sent: 3/16/2007 1:17 AM

The following recipient(s) cannot be reached:

edwincwong@xxxxxxxxxx on 3/16/2007 1:17 AM

You do not have permission to send to this recipient. For assistance, contact your system administrator.

MSEXCH:MSEExchangeIS:/DC=local/DC=ECW:ECWSBS

Actually I grand "full control" right to the new mailbox also, I did the following steps:

0. Create a new user in the AD users and computers snap-in
1. In the Active Directory Users and Computers snap-in, on the View menu, and click Advanced Features.
2. Right-click the new user account, and then clicks Properties.
3. Click the Security tab, and then click Add.
4. Add the user you want to let him own additional mailbox
5. Grant the allow full control rights to the original user
6. Click the Exchange Advanced tab, and then click Mailbox Rights.
7. Click Add, and add the original user, and then click OK.
8. Select "Allow permission" for the "Read Permissions", "Full

Re: Exchange Mailbox is SBS 2003

Mailbox

Access", "Change Permission" and "Take Ownership" rights.

In the outlook 2003 of the original user, please click tools -> Email accounts -> View or Change existing email accounts -> Change -> More Settings -> Advanced tab -> Add -> Input the alias of new account -> Click

OK -> Restart the outlook to take effect.

By above settings, the user will have two mailboxes in his outlook.

Both of

them can be operated normally. You can send email from both mailbox by

specifying the sender. (New message -> open by "From" list -> input the other)

I got this instructions from the following:

[http://groups.google.com/group/microsoft.public.backoffice.smallbiz2000/browse\\_thread/thread/bb5bef1cf00cb3bc/e6](http://groups.google.com/group/microsoft.public.backoffice.smallbiz2000/browse_thread/thread/bb5bef1cf00cb3bc/e6)

Thanks again for your time!

- Edwin

Hi Edwin,

Thanks for posting in our newsgroup.

From your description, I know that you want to create a new Exchange mailbox without adding news user. If I am off-base, please don't hesitate to let me know.

First, I am sorry we cannot create a new Exchange mailbox without adding news user. The Exchange server is tightly related to Active Directory. When a E-mail is send to Exchange, it will first query user information from AD. Instead you can create a Domain user without having mailbox.

If you want to create a mailbox to send mails with different Froms,, you can do the following to get the aim:

Suppose you use mailbox Sha...@xxxxxxxxxxxxx, you need to sent e-mail with From: Users1.contoso.com.

Create a new account with mailbox named as Shard.

Open Active Directory, and then expand to Domain.local->MyBusiness->Users->SBSUsers.

Right click Properties of User1 and selects Exchange General, select

Re: Exchange Mailbox is SBS 2003

Delivery Options.

Click Add and input Shared. Click OK.

Open Shared; Outlook, create a new e-mail.

Click View on the menu, make sure From Field is checked.

In the From field, input User1.contoso.com.

In this method, you can send a mail with From: User1.contoso.com using Sha...@xxxxxxxxxxx ;@s mailbox, but you can see Shared on behalf of user1 in the mail content.

Hope above information helps.

I am not sure if I understand your concern clearly. If you need further assistance, please don't hesitate to let me know.

Have a nice weekend.

Best regards,

Robert Li(MSFT)

=====

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check<http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
