And popbeamer... I think this passes it onto the SMTP route, assuming you dont have xwall. If this is correct, (as I dont use it) could be a good reason for popbeamer. GFI mail essentials has built in spam filter, pop3 connector and disclaimer to name a few.

All I know for sure at this point is that spam has dropped to zero and it is sent to the Archive folder.

And that I use POP3 and IMF.

hi wedor..

<http://support.microsoft.com/kb/555602> 2nd question from the end

also... <http://www.google.co.uk/search?q=imf+pop3&btnG=Search&hl=en> gives more detailed explanations i.e pop3 passes mail straight to CDO bypassing SMTP filters.

I dont use popbeamer (prefer GFI mailessentials) but <http://www.popbeamer.com/> says xwall is the spam add on ?

" If you implement IMF then this doesn't work using POP3"

I keep reading this but do not actually find it to be true, I

Re: POP3 Schedule

currently collect my mail via POP3 using PopBeamer and have IMF enabled and it does indeed filter the mail.

Maybe the use of PopBeamer makes this different, I don't honestly know.
