Hi Robert,
using the first article "How to reset security settings back to default" seems to have fixed the problem.

Thanks.

Hi,

Thanks for posting in our newsgroup.

From your description, I know that when you tried to log on another PC via Remote Desktop Connection, you get message: "The local policy of this system does not permit you to logon interactively". If I am off-base, please don't hesitate to let me know.

Please let me know the following to make the situation more clearly:

1. When you RDPed to the remote PC, which kind of account do you use domain administrator, domain user, local administrator, local user, or other type ?

I made a test on my test machine as you said in the post. First I logon as a local administrator, then as a Domain Administrator, I noticed the "Add User or Group" and "Remove" is not gray out.

I did the following:

1. Open Local Security Policies snap-in under administrative tools.

2. Go to:

Computer Configuration -> Windows Settings -> Security Settings -> Local Policies ---> User Rights Assignment

3. In the right-pane, double-click on "Allow Logon through Terminal Services".

Re: The local policy of this system does not permit you to logon interactively

4. Click "Add User or Group" and successful added the user.

Please try to take the following steps to narrow down this problem:

1. Please logon the client with another local administrator account, will the same problem occur?

2. Please logon as a domain administrator, will the same issue occur?

3. Please reset security setting to default and then check again.

1) Click Start, click Run, type cmd, and then press ENTER.

2) Type secdedit /configure /cfg %windir%\repair\secsetup.inf /db secsetup.sdb /verbose, and then press ENTER. You receive a "Task is completed" message, and a warning message that something could not be done. You can safely ignore this message.

For more information, please refer to:

How to reset security settings back to the defaults

<Hi,
<I am unable to logon to a PC at work through Remote Desktop

Re: The local policy of this system does not permit you to logon interactively

<Connection. It displays the logon screen and when I enter my password,
<it says "The local policy of this system does not permit you to logon
<interactively".

<

<- I am a member of Remote Desktop Users (on top of other groups)
<- I ran secpol.msc and made sure that "Allow logon through terminal
<services" includes Remote Desktop Users. Also made sure that "Deny
<logon ..." did not include Remote Desktop users. However, "Add User or
<Group" and "Remove" buttons are grayed out, so I cannot add my user ID
<explicitly.

<- When I right click on My Computer / Properties / Remote, the
<checkboxes for Remote Desktop and Remote Assistance are checked. When
<I click "Select Remote Users", my user id is listed under the textbox.

<_ I am part of local administrators group.

<

<What else do I need to do to get remote desktop working!?

<

<Thanks.

<
