Hello Richard,

Thank you for posting here.

According to your description, I understand that you get error "An error occurred while creating the Connection Manager Configuration package file." when you run Remote Access Wizard. If I have misunderstood the problem, please don't hesitate to let me know.

Based on my research, this is a known issue when you install windows 2003 sp1 on SBS 2003.

To resolve this problem, follow these steps:

1. Remove Windows Server 2003 SP1. To do this, follow these steps:
 - a. Click Start, point to Control Panel, and then click Add or Remove Programs.
 - b. In the Add or Remove Programs dialog box, click Windows Server 2003 Service Pack 1, and then click Remove.
 - c. In the Windows Server 2003 Service Pack 1 Removal Wizard, click Next to remove the service pack.
2. Run the Remote Access Wizard again. To do this, follow these steps:
 - a. Click Start, and then click Server Management.
 - b. In the console tree, click Internet and E-mail.
 - c. In the details pane, click Configure Remote Access.
 - d. Follow the instructions on the screen to complete the wizard.

Meanwhile, this problem is corrected in Windows Small Business Server 2003 SP1. Therefore, if you do not want to remove windows 2003 sp1 from SBS 2003, we suggest you install SBS 2003 sp1 on your SBS:

RE: Remote Access Wizard Error

Service Pack 1 for Windows Small Business Server 2003, Standard Edition
http://download.microsoft.com/download/d/5/b/d5be2c2c-b1cb-47f8-9235-8cf89820139e/Readme_std.htm

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

| Specifying error location (in CMAK) returned OK

RE: Remote Access Wizard Error

| *** CRRASCommit::CommitCMAK returned ERROR 80070001

| *** CRRASCommit::CommitEx returned ERROR 80070001

|

| There were a couple of other posts with similar errors, tried those
| suggestions but still get the same error.

|

| Any help would be greatly appreciated.

|

| Thanks,

| --

| Richard
