You can do this, but the pop3 mail server in Exchange is disabled as a part of the measures to prevent open relay.

Set up multiple email profiles in Control Panel > Mail and then when you start Outlook you can select which profile

Good afternoon...

I have multiple e-mail accounts and want to keep the primary e-mail account in Outlook 2003 and several secondary e-mail accounts into Outlook Express. ALL mail is delivered to SBS2K3's Exchange. Outlook Express would then pull the secondary e-mail addresses from the SBS2K3 box. I'm assuming this is possible but haven't figured out yet how to make this play nice. In OE, I've set the servers to the OP address of the SBS box and even tried the mail domain name of the SBS box with no luck. Any pointers or a KB item - which I haven't been able to find as yet.

Thanks,

Bill
