thanks for the heads up because I'm searching and don't see it. Have a blessed weekend!

Anthony Smith wrote:

I'm sorry Jeff but I'm looking and I don't see your post. Thanks!

Some ISP Usenet feeds drop *many* messages. Try using msnews.microsoft.com for all Microsoft Public newsgroups. Then go back and look for Jeff's reply. It's in there.

Good Morning Cris,

I hope you are doing well. Any response from Jeff on the Courtyard arrangement?

Jeff did not have any
immediate recollection of
the whole
courtyard thing.
If you have a link it make
refresh some memory.

Unfortunately this is one of
those cases when the say,
you have to
spend money to make
money, probably holds true.

Just remember, if this is
connected to your
accounting software,
you are exposing your
company's financial data
and records to the
web. I would hope that
you've researched the kind
of connections
between your webserver and
the backend stuff and how
the software
protects that. --

Thanks for
the reply
Cris. As
stated in my
post I don't
have
much of a

Re: Courtyard arrangement – Jeff Middleton

choice
because of
our new
accounting
software.
The
ecommerce
site that
comes with
the software
is top of the
line. We'll
be forking
out
hundreds/mo
for hosting
both
accounting
&
website or if
we just had
an ISP for
the site,
setting up a
VPN
tunnel is
expensive
also. We
have to
try hosting
in-house.
When sales
increase
with this
website and
visitors
increase
than we can
justify
hosting it
offsite God
willing.
With
approx.
2000–3000
visitors per
month our
cable
connection
should
be fine.

Re: Courtyard arrangement – Jeff Middleton

We can get
close to
1MB UP
with about
8MB down
with our
cable/internet
provider.

Thanks for
pinging Jeff
for me.

one
of
the
main
problems
with
folks
hosting
a
public
website
(putting
security
issues
aside)...especially
for
ecommerce
and
if
you
plan
a
reasonable
volume
of
business,
is
your
connection
to
the
internet?

Re: Courtyard arrangement – Jeff Middleton

What
is
your
uplink
speed
to
the
net

Most
business
connections
are
either
384
or
512kbps
uplink....Not
ideal
for
webhosting...thats
why
its
always
better
to
put
it
with
the
folks
who
have
the
big
pipes.

If
I
want
to
buy
something
from
a
website,
and
performance
is
poor..I
may

Re: Courtyard arrangement – Jeff Middleton

cancel
or
not
buy
there
again.

I'm
trying
to
ping
Jeff
to
alert
him
to
your
posting.

Good
Afternoon,

I'm
looking
to
set
up
a
webserver
for
a
public
website
and
after
searching
google
for
information
on
this
topic
I
found
several
discussions
that
Jeff
Middleton
was
in.
I
am
interested
in
learning
more
about
this
courtyard
arrangement
spoken
of
in
a

Re: Courtyard arrangement – Jeff Middleton

Aug
5th
2002
topic
called
"SBS
and
hosting
(newbie
at
hosting)".

We're
running
SBS2003
and
just
added
a
member
server
Windows
2003
R2.
I'm
assuming
I
will
have
to
remove
this
as
a
member
server
since
we
will
be
implementing
a
DMZ.
The
reason
we
are
hosting
our
website
because

Re: Courtyard arrangement – Jeff Middleton

our
business
accounting
application(SQL
backend)
that
is
run
on
SBS
allows
us
to
put
our
products
online
but
the
database
and
ecommerce
must
reside
in
same
building
or
set
up
an
expensive
VPN
tunnel
with
an
ISP.
We
could
have
an
ISP
host
the
database
application
AND
website
or
we
have

Re: Courtyard arrangement – Jeff Middleton

to
host
it
ourselves,
as
long
as
the
database
and
website
are
under
1
roof
it's
ok
as
I
was
told
by
the
software
vendor.
It'll
be
too
expensive
for
us
to
have
the
database
local
and
set
up
a
VPN
tunnel
to
a
ISP.
So
we're
going
to
try
to

Re: Courtyard arrangement – Jeff Middleton

host
it
ourselves.

After
looking
at
several
discussions,
I
like
this
courtyard
arrangement
referenced
in
the
discussion
"SBS
and
hosting
(newbie
at
hosting)".
Do
you
have
a
diagram
possibly
showing
how
this
would
be
done.
Also
is
there
any
documented
information
for
setting
this
up?
Would
you
still
recommend
this

Re: Courtyard arrangement – Jeff Middleton

arrangement
in
2007?
(smile)
This
was
your
recommendation
among
others
back
in
2002.

Thanks!

Sincerely,
Anthony
Smith
In
God
We
Trust!
